

Release Note

Edgecore ECWO5211-L Release v3.45.0002

Document # Edgecore_ECWO5211-L_v3.45.0002_1.36-1.9788.2.10

Enhancement from v3.45.0001_1.33-1.9788.2.8

Table of Contents

1	Feature Enhancement	3
1.1	Add the protection mechanism to prevent system randomly hang up and kernel panic...3	
2	Issue Fixed	4
2.1	Fix the connection issue for NAT mode of SSID.....4	
3	Compatible Version for AP Management	5

1 Feature Enhancement

1.1 Add the protection mechanism to prevent system randomly hang up and kernel panic

In proxy arp section, a mechanism has been added to protect the proxp arp resources. If multiple proxy arp requests use the same proxy arp resources, these resources can be protected to prevent system randomly hang-up and kernel panic issue.

2 Issue Fixed

2.1 Fix the connection issue for NAT mode of SSID

In some scenario, when the SSID is set to NAT mode, clients can't get the correct IP via the SSID.

This issue has been resolved.

3 Compatible Version for AP Management

Compatible with EWS series v3.45.0000 and above.
