

Release Note

Edgecore EAP112 Release v12.6.11

Document # EAP112-v12.6.11-2905-6baeba221-9986227

Enhancement from v12.6.10-2883-ec9a0a962-69d5a59

Table of Contents

1 Feature.....	3
1.1 Support Ping Watchdog	3
2 Issue Fixed	4
2.1 EAP112-L CPU utilization spikes above 70% with no clients connected.....	4
3 Compatible Version for AP Management	5

1 Feature

1.1 Support Ping Watchdog

Ping Watchdog periodically pings a configurable primary IP (with optional failover IP) to verify connectivity, and automatically reboots the device after a set number of consecutive ping failures. Users can enable/disable the feature and configure IPs, ping interval, and failure threshold from the UI.

PING WATCHDOG

Enable Ping Watchdog

IP Address

Failover IP Address ?

Interval (min) ?

Failure count ?

2 Issue Fixed

2.1 EAP112-L CPU utilization spikes above 70% with no clients connected.

The EAP112-L CPU utilization frequently spikes above 70% and occasionally reaches 100% even when no clients are connected to the AP. The issue is visible on the cloud dashboard after adding the DUT and monitoring CPU and radio status. In this version, the issue has been resolved.

3 Compatible Version for AP Management

Compatible with ecCLOUD
