1 Issue Fixed

1.1 CPU usage may occasionally spike to high levels.

The CPU utilization frequently spikes to 100% even under normal operation. The root cause is the odhcpd process consuming excessive CPU resources. In this version, the issue has been resolved.

1.2 HaLow radio throughput degrades in environments with high background noise.

The HaLow radio may experience reduced throughput in environments with high background noise. In this version, the radio configuration has been optimized to improve transmission performance under such conditions.

2. Compatible Version for AP Management

Compatible with ecCLOUD
