

Release Note

Edgecore EAP111 Release v12.4.1

Document # EAP111_v12.4.1-478-6c9597c1-3aa904

Enhancement from v12.4.0-439-28ee6785-80f687

Table of Contents

1	Feature.....	3
1.1	Support India Regulation	3
2	Issue Fixed	4
2.1	The kernel panic happened when attempting cloud management via QR code onboarding.....	4
2.2	Clients are unable to connect to the enterprise SSID when the VLAN tag is enabled on the WAN port.....	4
2.3	The wireless scheduling occasionally malfunctions.....	4
3	Known Issue.....	5
3.1	The broadcast rate only works in the basic rate.....	5
3.2	Unable to associate when more than 3 SSIDs are created, and cannot obtain an IP address in "Router to Internet".....	5

1 Feature

1.1 Support India Regulation

Support India Regulation. The supported channels are listed below.

1. 2.4GHz: channel 1-13
2. 5GHz: channel 36-52 channel 149-165

2 Issue Fixed

2.1 The kernel panic happened when attempting cloud management via QR code onboarding.

The kernel panic occurred when selecting the cloud management through QR code onboarding. In this version, the AP can be managed by ecCLOUD through QR code onboarding.

2.2 Clients are unable to connect to the enterprise SSID when the VLAN tag is enabled on the WAN port.

When the VLAN tag is enabled on the WAN port, clients cannot connect to the enterprise SSID. In this version, the issue has been resolved.

2.3 The wireless scheduling occasionally malfunctions.

Enable wireless scheduling on ecCLOUD. The SSID is not enabled or disabled on time according to the configuration settings. In this version, wireless scheduling works properly.

3 Known Issue

3.1 The broadcast rate only works in the basic rate.

3.2 Unable to associate when more than 3 SSIDs are created, and cannot obtain an IP address in "Router to Internet".
